

CME INFORMATION

**ADVANCED REVASCULARIZATION - CHAPTER XVII (ARCH 2024) SYMPOSIUM
APRIL 17 - 19, 2024
ST. LOUIS, MISSOURI**

Target Audience

This activity is designed to meet the educational requirements for Interventional and General Cardiologists, Electrophysiologist, Internists, Cardiothoracic Surgeons, General Surgeons, Primary Care Physicians, and Neurologists plus Nurses, Nurse Practitioners, Residents, Fellows, and Ancillary staff.

Educational Goal

The purpose of this educational activity is to focus on evidence-based data, newer technological advances, case-based discussions, tips and tricks in complex cases, innovative therapeutic strategies that will enable physicians to treat their patients with high-risk and complex coronary, peripheral vascular and structural anatomy for the busy practicing physician and trainees.

Learning Objectives

- Interpret the pivotal coronary disease management trials of the past year and how they can be applied to bedside patient management in 2024.
- Identify the role of adjunctive imaging and physiology for diagnosis and management of complex cardiovascular disease.
- Comprehend the expanding role of the Heart Team Approach
- Discuss interventional approaches to end stage heart failure patients.
- Evaluate the development of new technology-imaging modalities, IVUS, OCT, MRA, and CT angiography.
- Explain practical techniques relating to highly stenosed lesions and the use of percutaneous left ventricular assist devices (LVAD).
- Differentiate the distinction between the specific clinical features of appropriate use criteria and the evidence-based summaries on which PCI guidelines are developed.
- Discuss the indications, benefits, and relative risk of radial artery based coronary interventions.
- Describe strategies to improving quality and cost reduction in the modern cath lab.
- Define technically difficult and high-risk subsets.
- Discuss the relative role of trans-catheter and surgical therapies for advanced structural heart disease, both valvular and non-valvular, and atrial fibrillation.
- Appraise serious complications - how to avoid them, how to treat them.
- List the risks of radiation and ways to minimize exposure.
- Discuss and review the latest in drug delivery technology for patients with PAD.
- Discuss patient selection and latest technology for treatment of VTE/PE.

Accreditation

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of *CMEsolutions* and Gaffney Events. The *CMEsolutions* is accredited by the ACCME to provide continuing medical education for physicians.

The *CMEsolutions* designates this live activity for a maximum of 24.75 *AMA PRA Category 1 Credits*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Successful completion of this CME activity, which includes participation in the evaluation component and 75% passing on an MOC test, enables the participant to earn up to 24.75 Medical Knowledge MOC points in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

MOC credit will be reported within 30 days after successful completion of your request.

FEES

There are fees for participating in this activity.

PARTICIPATION REQUIREMENTS

1. Read CME Information.
2. Attend/Participate in Sessions – credit given commensurate with attendance.
3. Log on to the following URL: <https://online-med-edu.com/arch/041724/cme>
4. Complete evaluation, credit request form, MOC Test (75% passing grade required) and download or print credit statement/certificate.

Participants have 60 days to claim *AMA PRA Category 1 Credits*[™] and ABIM MOC.
